

WI-PMS310GFR-O
8GE+2SFP 24V Ports Outdoor
Reverse PoE Switch with 8-Port PoE
Data sheet

Highlights

- Port1-7 for PoE In, Port 8 for PoE Out, 2 SFP Fiber uplink ports
- PoE Output 24V 1A, DC output 12V
- IP67 Waterproof box
- Support 24V Passive PoE compliant PSD and PD
- L2/L3/L4 QoS and IGMP snooping optimize voice and video application
- Up to 4K QVLANS simultaneously
- Link Aggregation Control Protocol (LACP)
- Support STP/RSTP function
- WEB/CLI managed modes, SNMP, bring abundant management features

Typical Applications

Description

What This Product Does

Wi-Tek Reverse PoE Technology has intelligent Power management features to provide a centralized, uninterrupted Outdoor PoE solution for FTTx ISP/WISP project. It build a multi-user sharing network to reduce the cost for ISP in rural area. It's also provide an eco-friendly solution. Once one of the users initiates a network request, the ISP device is awakened to provide a timely and uninterrupted network service, While there is no request from end-users, the device turn to sleep mode and does not consume electricity.

How This Product Works

It integrates 2*1000Mbps Gigabit SFP Fiber Ports and 8*100/1000Mbps Gigabit Ethernet network capabilities. Port1-7 for PoE In, Port8 for PoE Out, Support 24V Passive PoE compliant PSD and PD, 2Gigabit SFP can do Uplink Port. 8 Auto-Negotiation RJ45 ports (port-1 to port-7) of the switch support Power over Ethernet (PoE) IN function. These PoE ports (port-1 to port-7) can automatically detect and accept power with those 24v Passive PoE compliant PSE. Then this switch can continue to power up next switch or wireless AP/CPE via PoE output port 8

Easy To Use

WI-PMS310GFR-O is easy to install and use. It requires no configuration and installation. With outstanding performance and quality, the WI- PS310GFR-O is a great selection for expanding your FTTB(fiber to the building) or FTTW(fiber to the wireless) network.

Advanced QoS features

To integrate voice, data and video service on one network, the switch applies rich QoS policies. Administrator can designate the priority of the traffic based on a variety of means including IP or MAC address, TCP or UDP port number, etc, to ensure that voice and video are always clear, smooth and jitter free.

Abundant Layer 2 features

For more application of layer 2 switches, WI-PMS310GFR-24V supports a complete lineup of layer 2 features, including 802.1Q tag VLAN, Port Isolation, Port Mirroring, STP/RSTP, Link Aggregation Control Protocol and 802.3x Flow Control function. Any more, the switch provides advanced features for network maintenance. Such as Loop Back Detection, Cable Diagnostics and IGMP Snooping. IGMP snooping ensures the switch intelligently forward the multicast stream only to the appropriate subscribers while IGMP throttling & filtering restrict each subscriber on a port level to prevent unauthorized multicast access.

Specifications

HARDWARE FEATURES	
Interface	8 RJ45 10/100/1000M ports 2SFP ports
