Digium® Cards

The Best Choice for Asterisk Implementations— Straight from the Source

Digium · The Asterisk Company
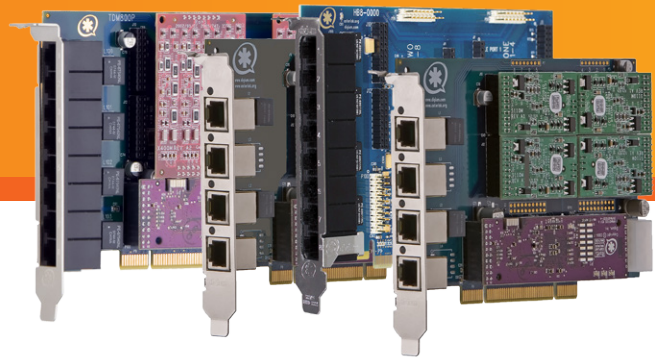

Complete interoperability— cards designed by the developers who create Asterisk

As the creators and sponsor of Asterisk, the Digium telephony card product line is developed and optimized to work with Asterisk and its open source drivers.

There are many advantages of Digium's telephony cards for Asterisk. For example, there is no need to obtain and maintain third party drivers as needed with other cards. In fact, the Digium telephony cards are a primary source of revenue that funds part of Digium's core charter, which is to support the expansion of the Asterisk project.

As technology needs and trends change you will want to future-proof your communications by continuing to rely on Asterisk and supporting its evolution. Asterisk has the largest global community of any open source communications project. Additionally, Digium contributes over half of the

The most expertise. The best value. Only from the creators of Asterisk.

code to every Asterisk release. This is why new features are added so quickly, while other projects lag behind. When you purchase Digium products, including our world class telephony boards, you are funding the future development of Asterisk. This ensures you will have a stable platform with the features you need to run your business effectively for years to come.

AsteriskExchange Markeplace

A home for the community's commercial products and applications built on or integrated with Asterisk. Online marketplace listings include software, hardware and complete business communication solutions.

Digium continues to be the market leader in providing high-performance, cost effective, quality telephony cards that extend the functionality of Asterisk software to connect to the Public Switched Telephone Network (PSTN). Digium offers a full line of high quality analog and digital interface cards to connect your IP PBX, IVR, VoIP Gateway, or custom telephony solution to the public telephone network.

Don't be fooled by imitators — get the facts
