Education

CASE STUDY

About The School of Raya

The School of Raya, Where education transcends the ordinary, inviting students to embrace a transformative journey, like no other. Imagine a place where lessons become games, where the playground transforms into a science class, and subjects are not taught but lived. We invite children not to study but to embark on a dynamic journey of expansion. To a space where their curiosity knows no bounds, and they can experience the real meaning of balanced growth. So they can freely emerge as conscious citizens primed for a life of perpetual discovery, by empowering their unique journey. This is education, not as it has always been, but as it should be – a vibrant, ever-flowing experience. This is The School of Raya.

Customer Requirement

- The School of Raya required a Cost Effective UC Solution for their admin buildings
- Detailed Report of Incoming, outgoing calls, Recording Calls, Abandoned call, etc. all reports downloadable in CSV, PDF and Excel format.
- Centralized UC Solution which should work on existing OFC backbone connecting old & new building across huge Multi acre premises covering the School Of Raya.

Solution Offered

We worked Closely with our SI Partner who done the Site Survey, We had installed Grandstream UCM6302 at with around 14 numbers SIP Phones. Using customer's existing LAN only we had implemented this IP intercom solution. At present they have 1 PRI line which has been terminated in this IP-PBX system. Gradually they keep on increasing SIP phones after seeing these of deployment and maintenance.

Challenges Faced

Competitors like Matrix & NEC etc. were there in the race. They were proposing them Analog PBX solution.
