MILEIGHT SMART AND INTELLIGENT SURVEILLANCE & NVRs

H.265+, Smart IR II, PoE, Video Content Analysis, PoE, Built-in Speaker, Super WDR upto 140dB, 36x Optical Zoom, 360 degree panoramic view, weather-proof, vandal proof, starlight, PTZ, Face Detection, ONVIF G/T, LPR/ANPR Cameras.

About Milesight

Milesight is a professional high-tech enterprise specializing in the design and manufacture of best-in-class IP surveillance solutions with superior image quality, exceptional flexibility and reliability for the global market. Milesight offers a comprehensive IP video surveillance solution. The product line ranges from network cameras and NVRs to video management software from entry-level to high end, meeting demanding needs and various applications. Milesight is able to introduce innovative products and satisfy customers' needs with customized solutions. Milesight is a fast-growing R&D based company driven by a genuine passion and desire to offer the IP video surveillance market the highest quality standard products.

Leading-edge H.265+ Compression

H.265+, the advanced video codec, saves 70%~80% bandwidth compared with H.264

Powerful Auto Back Focus

Equipped with Auto Back Focus Technology, Milesight box cameras are able to adjust the position of the image sensor for optimal focus to complete the last step of focusing by pressing only one button

Ultra-high Definition (4K & 12MP)

High definition offers good detail while ultra-high definition enables ultimate clarity image in which no detail will be missing. Sharper pixel, brighter color and much more details are what Milesight 4K and 12MP network camera series bring to users.

Smart IR II

Milesight Smart IR II Technology has greatly satisfied different distance requirements and flexibly fitted various application scenarios. The IR intensity is adjustable to fit different lighting conditions in various specific viewing angles, which would guarantee the image quality to avoid problem of overexposure and darkness.

Ultra Low-light Capability

The Milesight Starlight Premium Series can function in minimal light conditions reaching 0.001Lux(Color) or 0Lux(B/W), delivering clear videos in low illumination and near infrared light environments without any supplementary lighting.

140dB Super WDR

Milesight's sensor-based WDR technology allows the camera to record greater scene details with true color reproduction even under the extreme back light and high contrast conditions. The ratio that the brightest light signal values divided by the darkest light signal values is up to 140dB.

Video Content Analysis

Milesight Video Content Analysis (VCA) is an embedded application package for whole Milesight Network Cameras series which enhances the performance of Milesight cameras through 10 detection modes including region entrance, region exiting, advanced motion detection, tamper detection, line crossing, loitering, human detection, people counting, object left, object removed.

3-1 Super WDR Pro

Milesight Super WDR Pro outputs the data for up to three frames with different storage times line by line and combines them into one clear image. By performing special signal processing with an ISP (Image Signal Processor) or other devices at the image sensor rear-end, this enables improvement of picture quality under low illumination compared to the multiple exposure-type WDR function.

LPR/ANPR Cameras

Milesight LPR/ANPR is embedded on Milesight Network Cameras. It automatically detects and captures license plate in real time and compares to a predefined list, then takes appropriate action such as generating an alert once the license plate is on the predefined black list.

SIP/VoIP Support

Milesight H.265+ Mini Dome Network Camera features industry leading SIP/VoIP function and video streaming for mobile phones and video phones.

P2P

By scanning the QR code on NVR web-page, users can add equipment to mobile phone and watch live view in WAN by P2P on M-Sight Pro. It is a truly convenient way of monitoring for it is unnecessary to do port forwarding.

P-Iris

The Milesight network camera with P-Iris control technology is able to precisely control the iris opening in all lighting conditions, offering images with better contrast, clarity, resolution and depth of field.

High Light Compensation (HLC)

HLC (High Light Compensation) can identify the high light spot and adjust the expose time to compensate for the area around strong light spots.

New File System

Applied with the New Milesight File System (MSFS), Milesight NVRs bring completely new user-experience, making it faster, more responsive, more stable and more enjoyable.

• Convenient Playback

With feature-rich playback interface and functional playback types of General, Event, Tag and Picture Playback, the Playback of the NVR is boast to provide different and efficient operation.

• Superior Retrieve

Allowing to easily search, view and backup, the Retrieve function which is newly added to the file system guarantees simple and fast management, satisfying various demands.

4K Video Viewing Experience

Milesight 4K NVR series support up to 4K definition live-view, playback and recording, providing ultra-high definition viewing experience.

Powerful Decoding and Recording Performance

Enabling synchronously decoding up to 16-CH 1080P network cameras and record up to 32-CH 5MP high resolution cameras to the maximum extent, Milesight NVRs are ideal for those applications requiring robust decoding and recording performance.

VCA in NVR

10 detection modes of Milesight VCA function including Region Entrance, Region Exiting, Advanced Motion Detection, Tamper Detection, Line Crossing, Loitering, Human Detection, People Counting, Object Left, Object Removed.

10 VCA functions for Milesight NVRs! With the availability of the VCA, Milesight NVRs label themselves as intelligent on the basis of the powerful file system MSFS. The easy setup and good compatibility will have no doubt to offer delightful user experience.

Plug & Play

Independent PoE ports for easy connection and configuration of network cameras. The NVR will automatically detect, configure and play the live view of PoE network cameras once the cable is plugged.

CyberData Industrial VoIP Phones/SIP PA System & Intelligent Door Intercoms

About CyberData

CyberData
The IP Endpoint Company

Founded in 1974 in Monterey, California, CyberData Corporation is a leading OEM design and manufacturing firm with more than 40 years of experience. Specialize in IP Endpoints for the VoIP marketplace, VoIP and POS (Point-of-Sale) connectivity solutions, and POS protocol conversion technologies.

Develop and manufacture products that are known for quality, reliability, ease-of-use and durability. They have a full service prototype-to-production capability. Reputation has earned numerous OEM relationships with companies such as Epson, Dell, HP, Atlas IED, Additech, Fujitsu, NCR, Wincor-Nixdorf, and Bixolon.

Industrial VoIP Phones

CyberData's new line of PoE-enabled SIP ruggedized phones combine the benefits of VoIP with a rugged designed phone, built to withstand harsh environments such as extreme temperature, bad weather, and vandalism.

011460 SIP Weatherproof Keypad Phone

011463 SIP Heavy Duty Emergency Keypad Call Station

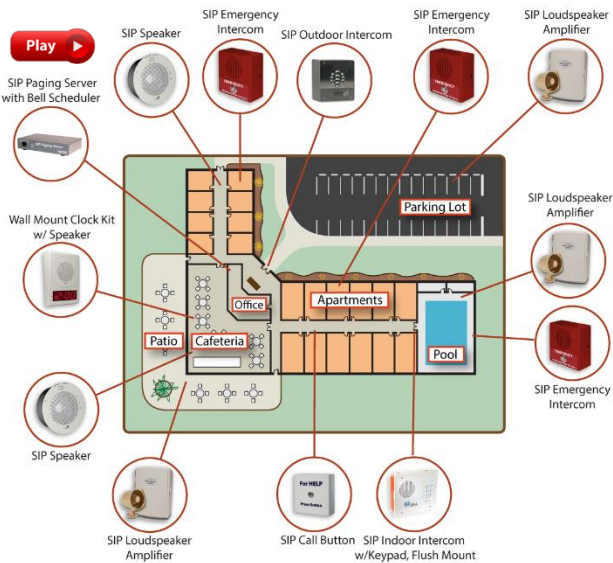

011461 SIP Vandal Resistant Keypad Phone

011462 SIP Armored Steel Ringdown Phone

SIP Public Address System/IP Door Intercoms (Indoor & Outdoor) Play ▶

These Powered over Ethernet mass notification devices are perfect in a variety of indoor or outdoor environments. They provide an easy method for implementing IP-based one-way or two-way paging for VoIP Phone Systems.

IP Intercoms come in a variety of options: one button, keypad, indoor and outdoor. These intercoms can also be used for two-way communication and secure access control as well be part of your mass communication solution.

Epygi - Integrated Communications & IoT Solutions with QX Line of Products

Call Centre | Hospitality | Schools | Enterprises

About Epygi Play ▶

Epygi Technologies, LLC, a worldwide provider of award-winning IP PBXs, Gateways and ecQX Cloud Services, supporting small businesses to enterprise's telephony needs, is a private US company founded in 2000 and has its headquarters in Winter Park, Florida. Reliable, secure and easy to install and use, the Epygi products offer users outstanding benefits and an unparalleled range of features at very economic prices. Customers are able to improve their productivity, lower operating expenses and enhance their image while affording the latest in telecommunications equipment.

Business Phone Systems

Digium Switchvox offers affordable, end-to-end VoIP solutions

About Digium

Digium®, Inc. provides Asterisk® software, telephony hardware, and on-premises and hosted Switchvox business phone systems that deliver enterprise-class Unified Communications (UC) and UC as a Service (UCaaS) solutions at an affordable price. Digium is the creator, primary developer and sponsor of the Asterisk project; the world's most widely used open source communications software. Asterisk turns an ordinary computer into a feature-rich communications server. A community of more than 80,000 developers and users worldwide uses Asterisk to create VoIP communication solutions in more than 170 countries. Since 1999, Digium has empowered developers to create innovative communications solutions based on open standards and open source software, providing an alternative to proprietary phone systems. Digium Switchvox Cloud and other cloud-based products and services are offered through Digium Cloud Services, LLC, a wholly owned subsidiary of Digium, Inc. Digium's business communications products are sold through a worldwide network of reseller partners. The company's product line includes a wide range of telephony hardware and software to enable resellers and customers to implement turnkey VoIP systems or to design their own custom communications solutions. At Digium, we're changing the way businesses communicate.
